

MARTIN

Precise and reliable for more than 90 years

Johannes Jürgens, master carpenter, Attendorn, Germany

„ We expect from our machines what our customers expect from us in return: peak performance at the highest quality level - quick, precise, reliable. In a market environment where the only constant is change, MARTIN machines have always best suited our requirements. “

MARTIN is one of the leading manufacturers of woodworking machinery.
Our range of products:

Precision
The T45
Thickness Planer

Versatile
The T45 Contour
Thicknessing- and
Profiling Machine

With our innovative machines we at MARTIN provide you with the perfect tool for your job. They operate safely and easily, provide cutting edge performance all the while making sure that your company continues to prosper over the long term.

Each and every MARTIN machine unites the highest level of quality with innovative technology and user-friendly operating concepts. Apart from maximum precision and user-friendliness the long-term resale value has been very appealing to our customers for almost 100 years. Attention to detail is what separates a MARTIN machine from that of other manufacturers. Functionality and ease of use are combined with timeless design and outstanding durability.

While it may be true that our machines are not among the cheapest ones on the market they are certainly among the most cost efficient ones. As far back as the 19th century John Ruskin, a prominent British social thinker wrote, that it was unwise to pay too much but that it was even unwise to pay too little. When you pay too much, he said, you lose a little money, that is all. But when you pay too little, you sometimes lose everything because the thing you bought is incapable of doing the thing you bought it to do.

Everyday, we at MARTIN continue to work with the same dedication and passion to offer machines to you that permanently fulfil their daily tasks with the best possible results and that satisfy your customers' demands.

MARTIN - a lifetime investment!

(1) Always
in control...

(2) Precise,
planed surfaces...

(3) Profiling flexibly -
Slotting, grooving, chamfering...

(4) Precise
angle edges...

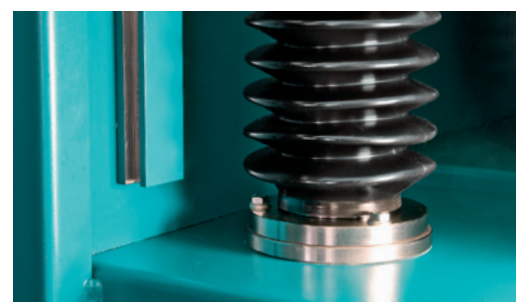

(5) Space saving...

(6) Short
set-up times...

(1) ... with MARTIN's innovative control technology

Settings can be made and stored quickly and precisely which makes day-to-day work a lot easier.

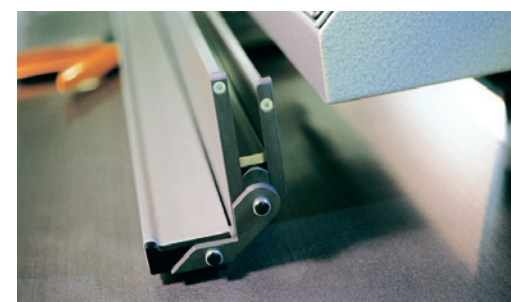

(2) ... with MARTIN's sturdy machine design

The thickening table is guided by 6 massive screws for long-term precise planing results.

(3) ... with MARTIN's unique Contour technology

With the T45 Contour planing and profiling is possible up to a width of 630 mm and a depth of 25 mm.

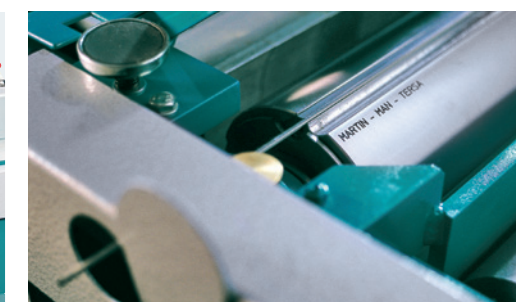

(4) ... with the MARTIN fence

Precise one-handed operation, smooth-running ball-bearing fence with integrated auxiliary fence.

(5) ... with MARTIN's two in one solution

Both machines can be nested in a space saving configuration to make the perfect planing „workcell“.

(6) ... with TERSA

Four different types of knives - one system. Quick change from HSS to HM and vice versa in under 30 seconds with maximum precision.
